CladToHelp
Honest help through cladding remediation and more

Real projects are complex, imperfect and constantly evolving, and the flows may not occur exactly as shown. Please get in touch via www.cladtohelp.co.uk for guidance from a leaseholder, RMC director, Chartered Civil Engineer and Project Management Expert who developed this flowchart and can provide first-hand advice on its real world application.

Disclaimer
This flowchart does not constitute legal, engineering or fire safety advice. It is intended purely as a Project Management tool to help understand a complex process in an easier-to-visualise way. Any legal, engineering or fire safety advice should always be obtained from a qualified and competent professional. The latest Laws, Regulations and Government guidance should always be checked and followed. Stage 2 shown on this flowchart is a simplified version of the RICS EWS1 Form guidance for illustrative purposes. Latest RICS guidance should always be referred to for EWS1 Form requirements. Your EWS1 Form assessor or Fire Engineer will always recommend if remedial works are required or not. This information is provided in good faith and we assume no responsibility or liability for any errors or omissions in the content. Under no circumstances will Clad To Help Ltd. be held responsible or liable in any way for any claims, damages, losses, expenses, costs or liabilities whatsoever resulting or arising directly or indirectly from the use of or reliance on the information contained in this flowchart and on www.cladtohelp.co.uk or arising from your inability to use or access the information. Use of or reliance on the information does not guarantee that funding will be obtained from the Building Safety Fund or any other funding source, nor does it guarantee that a building will be remediated or a favourable EWS1 Form will be obtained.
